PROFESSIONAL SUMMARY

B.Tech graduate in Artificial Intelligence & Data Science seeking Support Engineer I and Data Analyst roles. Hands-on experience in application troubleshooting, SQL, Python, data cleaning, exploratory data analysis, workflow validation and technical documentation. Strong foundation in front-end and back-end concepts, with a structured approach to investigating issues, documenting findings and collaborating with teams.

TECHNICAL SKILLS

Programming: Python, SQL
Data Analysis: Pandas, NumPy, Matplotlib, Seaborn, Scikit-learn, TensorFlow/Keras, EDA, Data Cleaning, Data Validation
Web Development: HTML, CSS, JavaScript, Django, React, Node.js, FastAPI, REST APIs
Tools: Git, VS Code, Anaconda, Google Colab, Figma, MS Office

PROFESSIONAL EXPERIENCE

AI & ML Software Developer Intern | TECHCITI Technologies Pvt. Ltd, Bangalore | Jun 2025 – Jul 2025

- Worked on a Gold Price Prediction project, testing regression approaches and reviewing model outputs.
- Used Python to prepare and verify data for predictive analysis workflows.
- Investigated datasets and application inputs through data cleaning, preprocessing, validation and structured analysis.
- Documented results, evaluation observations and development activities to maintain clear project records.
- Collaborated with team members to discuss technical findings, clarify issues and support development reviews.

PROJECTS

Gold Price Prediction | 1-month AI & ML internship project (team of two)
Python, Pandas, NumPy, Matplotlib, Seaborn, Scikit-learn, TensorFlow/Keras, Google Colab

- Analyzed historical gold price data using preprocessing and EDA to identify trends and prepare data for model training.
- Applied Linear Regression and Random Forest Regressor, and built an Artificial Neural Network (ANN).
- Compared models using MAE, RMSE and R^2 score; applied feature selection and model tuning.
- Visualized gold price trends and predictions.

AgriSmart AI – Smart Agriculture Assistant
Python, FastAPI, Node.js, React, React Native (Expo), Vite, REST APIs

- Integrated REST APIs and back-end logic to process environmental and weather data into crop recommendations.
- Built crop disease detection from leaf images (38+ plant diseases with treatment tips), an AI farming chatbot, and light and dark themes.
- Tested application workflows from data input through back-end processing to recommendation output.

EDUCATION

B.Tech, Computer Science (Artificial Intelligence and Data Science) | J.N.N Institute of Engineering | 2022 – 2026 | CGPA: 7.92

Intermediate (MPC) | Vignan Junior College | 2020 – 2022 | 61%

10th Class (State Board) | Sri Gayathri EM School | 2019 – 2020 | 86%

CERTIFICATIONS

- Oracle APEX Cloud Certified Developer Professional
- NPTEL – IoT
- Introduction to Generative AI

LANGUAGES

English, Telugu, Tamil
